

Our Uniting Water Ceremony

Preparations for the water ceremony

Collect water from a place you care for

Put the collected water in an unbreakable container and close it carefully to be sure it's not leaking during travel or transport. If you are many children coming from the same place you can unite your water in one container.

One person from you area will bring the water to the ceremony in Nairobi.

The water from your area will be united in a ceremony with water from all the other participating groups.

When the water is united four children will be asked to read Our Uniting Water Declaration.

Children hand over the United Water to the Guests of Honor

The Guests of Honor give the United Water to the roots of the tree.

These 2 photos are taken from the Children's Meeting Place, United Nations, Nairobi.

After the ceremony, Globetree will bring the United Water to Sweden and put it in a freezer where it will stay until it's time for a new water ceremony.
